About me

Versatile Software Engineer with over **5+ years** of experience in the tech industry. My journey started as a **Fullstack Developer** (PHP/Laravel), which gave me a deep understanding of system architecture and API design. For the last **3+ years**, I have specialized in **Flutter**, delivering high-impact **Fintech** solutions.

Work Experience

Flutter Developer

Micros24, Tashkent

January 2021 – Present

Project: Multibank App (Fintech)

- Rebuilt the entire app architecture and migrated to a modern UI.
- Integrated **EIMZO** secure signatures and **Firebase Cloud Messaging**.
- Delivered critical features that helped the project secure investment and reach the maintenance phase.

Project: Anor Business App (Fintech)

- Developed the mobile banking solution for **Anorbank**.
- Implemented **MyID** and **EIMZO** for secure user identification.
- Used **Bloc/Cubit** for state management and handled complex real-time financial data.

Humokassa — Payment / POS Integration

- Developed integration APIs and updated UI/UX for the POS mobile ecosystem.
 - Integrated external POS/fiscal systems with the mobile application.
-

Fullstack Developer (Outsource / Contract)

Freelancer, World wide

2019 — 2022

Zolotoy Express – Cargo Management System

- Engineered a comprehensive end-to-end logistics and cargo management platform from the ground up.
- Developed core modules for real-time shipment tracking, automated billing/invoicing, and customer database management using **Laravel**.

Happytel CRM System

- Developed a custom CRM system designed to automate internal business processes and streamline company operations.
- Built a highly reactive and fast-paced user interface leveraging the power of **Laravel** and **Livewire**.

Multibroker, Tashkent

2023 – present

Project: Uzcsd Admin Panel (Laravel)

- Built a custom administrative dashboard from the ground up using **Laravel**.
- Engineered full **RESTful API integrations** to connect the panel with centralized data systems.
- Developed secure modules for data reporting and user management.

Project: Jett Website & Broker Panel (Bitrix PHP)

- Developed and maintained the admin panel specifically designed for brokers.
- Customized the **Bitrix PHP** environment to handle complex brokerage logic and workflows.
- Optimized the platform's performance to ensure smooth data handling for high-volume transactions.

Agat Credit Website

- Built a corporate website using **Bitrix PHP** to showcase financial services.
 - Implemented a custom CMS and responsive UI for seamless user experience.
-
